Dino-Lite MS35B stand

Square metal base with column and support providing several adaptable heights. Includes two special Dino-Lite holders.

The MS35B is a stable vertical desktop stand that was designed to be used with the Dino-Lite digital microscopes. It provides 360 degrees of horizontal axis rotational perspective and as much as 20 cm of vertical working distance from the object.

The Dino-Lite holder is mounted onto a ball and socket jointed post, which allows for a maximum of 45 degrees of adjustable lateral viewing angles. The ball and socket jointed post is mounted onto a dove tail slider for additional focus and magnification support. The slider can be positioned on any point of the pole for the various focal distances of the Dino-Lite digital microscope. The precision machine crafted components of this stand provide smooth adjustment and positioning in a well balanced and stable ergonomic design.

The MS35B is manufactured from a combination of resilient stainless steel and lightweight recycled aluminum. The MS35B is very portable which makes it easy to move it from one work area to another while enduring the harshest of work environments.

Technical data

Model	**MS35B**
Unit dimensions (WxLxH)	12,7 x 20,7 x 30,5 cm
Other	vertical pole can be extended with MS30X kit
